ACTIVIDAD 6. CONVERTIR XML A TXT

Dado el fichero 06.xml :

```xml
<?xml version="1.0" encoding="UTF-8"?>
<network>
    <ethernets>
        <name>enp0s3</name>
        <addresses>192.168.2.110/24</addresses>
        <gateway4>192.168.2.1</gateway4>
        <nameservers>
            <addresses>8.8.8.8</addresses>
            <addresses>8.8.4.4</addresses>
        </nameservers>
    </ethernets>
    <ethernets>
        <name>enp0s8</name>
        <addresses>192.168.2.111/24</addresses>
        <gateway4>192.168.2.1</gateway4>
        <nameservers>
            <addresses>8.8.8.8</addresses>
            <addresses>8.8.4.4</addresses>
        </nameservers>
    </ethernets>
</network>
```

Se pide obtener un nuevo archivo TXT con el siguiente formato

```
network:
  ethernets:
    enp0s3:
      addresses:
        192.168.10.10/24
  ethernets:
    enp0s8:
      addresses:
        192.168.20.10/24
  ethernets:
    enp0s9:
      addresses:
        192.168.30.10/24
      routes:
        to: default
        via: 192.168.30.1
      nameservers:
        addresses:
          8.8.8.8
          8.8.4.4
```
